

Bryan Castro Solís

COMPUTER ENGINEER

La Uruca, San José, Costa Rica | +506 6085-8215 | bryancastrosolis732@gmail.com | [LinkedIn](#)

About Me

Computer Engineer passionate about building reliable, useful software that improves people’s lives. I have strong foundations in data structures, algorithms, and object-oriented programming, and I enjoy solving problems through collaborative teamwork. I contribute as a Full Stack Developer on real-world web and mobile products, partnering with stakeholders to design, build, and ship features through the full development cycle. I constantly seek to learn new technologies, optimize performance, and contribute to meaningful innovation with integrity and impact.

Education

Costa Rica Institute of Technology (TEC) | Bachelor’s Degree in Computer Engineering 2021 - 2026

Experience

Full Stack Developer | Dual Servicios Feb 2025 - Today

- Led projects throughout the full development lifecycle, delivering web and mobile applications, APIs, and database solutions.
- Provided client support and troubleshooting, ensuring smooth operation of applications and databases.
- Applied Agile (Scrum) methodologies to manage projects and coordinate cross-functional teams effectively.
- Developed processes and implemented continuous improvement practices to enhance efficiency and quality.
- Participated in key stakeholder meetings for new projects and deployment planning.
- Implemented AI solutions to optimize internal processes, improving efficiency and decision-making.
- Communicated effectively across teams to ensure successful project delivery and continuous improvement.
- Recognized as Employee of the Year in 2025 for outstanding performance and contributions.

Full Stack Developer | TEC Project – UNED Feb 2024 – June 2024

- Design and develop a georeferenced sound map to promote the country’s culture.
- Utilize the WAMP stack (Windows, Apache, MySQL, PHP) for application development.
- Model the database and implement a layered architecture (Model-View-Controller, MVC) to ensure system scalability and maintainability.
- Implement functionalities to enable sound georeferencing and map navigation.
- Collaborate closely with the team to ensure proper integration of the system’s different layers.
- Apply the Scrum methodology for project management and iterative development.

Front End Developer | Frutas Y Verduras JCR May 2024 – June 2024

- Design and develop a website for a grocery store to enhance its online visibility.
- Apply the Scrum methodology for project management and iterative development.
- Implement a dynamic and user-friendly catalog of fruits and vegetables.
- Design a responsive website accessible across multiple devices.

Skills

- **Programming Languages:** JavaScript, TypeScript, Python, Java, SQL, HTML, CSS, Rust, PHP, C, C++
- **Technologies:** CakePHP, React, React Native, Node.js, Express, JSON, Bootstrap, Tailwind, Angular, npm
- **Database Technologies:** MySQL, SQL Server, MariaDB, Oracle, MongoDB
- **Tools:** GitHub, Git, Jira, Trello, UML, Figma, Scrum, Postman
- **Operating Systems:** Windows, Linux (Ubuntu, Fedora)
- **Soft Skills:** Leadership, Teamwork, Communication, Problem Solving, Critical Thinking, Adaptability

Languages

- Spanish | Native
- English | Intermediate (B2)
- Portuguese | Intermediate (B1)
