

Bryan Castro Solís

COMPUTER ENGINEER

La Uruca, San José, Costa Rica | +506 6085-8215 | bryancastrosolis732@gmail.com | [LinkedIn](#)

About Me

Computer Engineer passionate about building reliable, useful software that improves people's lives. I have strong foundations in data structures, algorithms, and object-oriented programming, and I enjoy solving problems through collaborative teamwork. I contribute as a Full Stack Developer on real-world web and mobile products, partnering with stakeholders to design, build, and ship features through the full development cycle. I constantly seek to learn new technologies, optimize performance, and contribute to meaningful innovation with integrity and impact.

Education

Costa Rica Institute of Technology (TEC) | Bachelor's Degree in Computer Engineering 2021 - 2025

Experience

Full Stack Developer | Dual Servicios Feb 2025 – Present

- Led projects throughout the full development lifecycle, delivering web and mobile applications, APIs, and database solutions.
- Provided client support and troubleshooting, ensuring smooth operation of applications and databases.
- Applied Agile (Scrum) methodologies to manage projects and coordinate cross-functional teams effectively.
- Developed processes and implemented continuous improvement practices to enhance efficiency and quality.
- Participated in key stakeholder meetings for new projects and deployment planning.
- Implemented AI solutions to optimize internal processes, improving efficiency and decision-making.
- Communicated effectively across teams to ensure successful project delivery and continuous improvement.
- Performed data analysis and built dashboards and reports to support data-driven decision-making.
- Wrote and optimized complex SQL queries to extract and analyze large datasets.
- Automated internal workflows and process optimizations using n8n to improve operational efficiency.

Full Stack Developer | CRM for Customer Service – Dual Servicios Feb 2025 – June 2025

- Developed an internal CRM system for customer service using CakePHP, following the MVC architecture.
- Applied Agile methodologies to plan and deliver features through iterative sprints.
- Integrated the WhatsApp Business API to enable direct, trackable customer communication within the CRM.
- Designed the database and core logic to manage customer interactions, cases, and support history.

Full Stack Developer | Georeferenced Sound Map Project – UNED Feb 2024 – June 2024

- Designed and developed a georeferenced sound map to promote the country's culture.
- Utilized the WAMP stack (Windows, Apache, MySQL, PHP) for application development.
- Modeled the database and implemented a layered architecture (Model-View-Controller, MVC) to ensure system scalability and maintainability.
- Implemented functionalities to enable sound georeferencing and map navigation.
- Collaborated closely with the team to ensure proper integration of the system's different layers.
- Applied the Scrum methodology for project management and iterative development.

Skills

- **Programming Languages:** JavaScript, TypeScript, Python, Java, SQL, HTML, CSS, Rust, PHP, C, C++
- **Technologies:** CakePHP, React, React Native, Node.js, Express, Bootstrap, Tailwind, Angular
- **Database Technologies:** MySQL, SQL Server, MariaDB, Oracle, MongoDB
- **Tools:** GitHub, Git, Jira, Trello, UML, Figma, Scrum, Postman, npm, n8n
- **Operating Systems:** Windows, Linux (Ubuntu, Fedora)
- **Soft Skills:** Leadership, Teamwork, Communication, Problem Solving, Critical Thinking, Adaptability

Languages

- Spanish | Native
- English | Intermediate (B2)
- Portuguese | Intermediate (B1)
